

Gutter Stuff[®] started in 1994 when the sole inventor Robert Jones, who had been in the building and remodeling business for 25 years, came up with the concept of stuffing the gutter with some kind of filter rather than covering it. After trying different types of material like plastic mesh, steel mesh, and different types of foam, he came up with the material that is currently being used and has been tested for several years. He then applied for patents that have recently been granted (US Patent # 7208081), decided on the name Gutter Stuff[®] and started marketing the product in 2003. Today Gutter Stuff[®] is still in it's infancy but is really starting to catch on with millions of feet already sold. Thank you for your interest in Gutter Stuff[®].

Gutter Stuff[®]

An incredible new wave of gutter protection. Invisible, effective and affordable, Gutter Stuff[®] is designed to fit completely inside any 5" or 6" K style gutter. Gutter Stuff[®] can be installed anywhere a K style gutter is hung. It's ideal for any home application, commercial building, or institutional project. The new wave of gutter protection leaves no leaf or debris problem unsolved.

Why GutterStuff® Pro?

Why are clean and free flowing gutters so important to the health of your home and family? Clogged gutters can cause a multitude of problems. The first and most important is that climbing ladders up one or two stories with cleaning tools and a bucket or bag is inherently dangerous for any homeowner. High numbers of accidents from ladder falls are recorded each year by people cleaning gutters and performing other outdoor ladder tasks.

The damage to your home from clogged gutters can be extensive. It can loosen and separate the gutters from the home rendering them ineffective. It can cause rotting fascia boards, allowing water to penetrate behind the wood and into the walls. Overflowing gutters pour water directly onto your foundation where wicking can lead to cracks and basement leaks.

From a health point of view, clogged gutters are a haven for Mosquitoes who will breed freely in such a cloistered moist environment, Mosquitoes live where they breed so you create your own colonies of mosquitoes that attack you constantly. Mosquitoes are both a health risk and a constant distraction to the enjoyment of outdoor life around your home.

Other bugs such as Spiders Bees, Earwigs and Termites are also comfortable with clogged gutters and can cause serious problems to your home.

Mold and mildew growth on walls, wood and other areas compromised by dampness are a distinct health hazard and must be prevented from growing around your home.

GutterStuff® Pro is a simple solution to a recurring messy and dangerous problem. It can prevent all of the above hazards when installed in your gutters.

Product Information

- Manufactured from exterior-grade poly-ether foam filter, Gutter Stuff® has been tested in the harshest weather conditions for many years with no failure in performance or durability. Gutter Stuff® inherent properties prevents fungus, mold, or mildew from forming. Gutter Stuff® makes it virtually impossible for leaves to enter the gutter so your gutters are always clean and free-flowing. Gutter Stuff® seals out all debris while allowing an enormous volume of water to flow through quickly.
- No other gutter cover, gutter screen, or guard system works as effectively to keep debris from entering your gutters.
- Gutter Stuff® installs snugly inside your gutters, is invisible from street level, and does not diminish the curb appeal of your home.
- Gutter Stuff® eliminates costly ice damming by keeping your gutters free flowing year round. Because it so completely seals out leaves and debris it also prevents birds, bees and mosquitoes from entering and breeding in your gutters. Gutter Stuff® will not collapse or become dislodged. Its soft texture cannot be damaged by falling tree debris unlike aluminum covers, and there are not screws to fix to the roof or risk the damaging of shingles while lifting them. Gutter Stuff® won't crack, crumble, dent, bend, or cave in. It simply sits in your gutters year after year performing.
- Gutter Stuff® can be installed professionally by your Gutter Stuff® dealer who will also service and correct any deficiencies in your system. Or for the willing and able, Gutter Stuff® can be installed by the homeowner.
- Without a doubt, Gutter Stuff® is the most practical type of leaf protection system, by far the easiest to install, and very cost effective when compared to aluminum gutter covers and guards.

Water flows through, Leaves blow away

Design & Function

GutterStuff[®] Pro, is the original Patented Foam Filter Insert, which prevents leaves and large debris from entering and clogging your gutters, while allowing all the rainwater to flow through the gutter system, rapidly.

This original, simple, and innovative concept which was first developed and brought to market by Gutter Stuff Inc. has been a huge success with homeowners throughout The USA, Canada, and now Europe and various other countries worldwide.

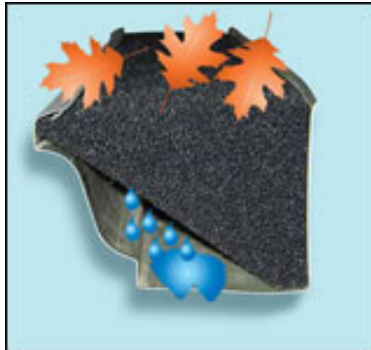

GutterStuff[®] Pro provides superior gutter protection against leaves, twigs, and other clogging agents. Its soft texture cannot be dented or damaged by falling branches. It remains snug and unseen in the gutter while keeping the homeowner safely on the ground.

GutterStuff[®] Pro also provides tremendous benefits to homeowners in winter as it does not freeze. With a 97% void capability and its heat absorbing ability, Snow and Ice cannot block it up. Whenever snow melts into the gutter, it will filter out and continue to flow through the system.

GutterStuff[®] Pro prevents your gutters from becoming the anchor for Ice damming, thus helping to eliminate costly roof damage. It can also reduce the occurrence of icicles hanging from the gutter.

Performance and Durability

GutterStuff[®] Pro is protected throughout by a flame retardant Latex coating which provides long life and complete outdoor protection and durability. The coating enhances the foams durability by “Rubberizing” it from top to bottom and protecting it from UV and environmental degradation without impeding the filtering and flow capability of the product. The product also contains a germicide package to inhibit biological growth within the foam.

GutterStuff[®] Pro is manufactured to the highest technical standards from the manufacturing Plant, through fabrication, to the thorough coating process.

GutterStuff[®] Pro demonstrates the highest degree of consistency and effectiveness in the industry and is backed by a 25 year performance warranty.

GutterStuff[®] Pro is available in all of the most common gutter profiles and can also be custom made for most any industrial, commercial, or unique project.

GutterStuff[®] Pro is easy to install - it is not screwed to the roof or the gutter lip. It either slides into the gutter under the spikes or hangers, or it can be trimmed to fit over the hangers. It can be installed into Half Round gutters with any common gutter sealer.

Because *GutterStuff[®] Pro* is attached only to the gutter, it can be used with equal ease on any roof type: shingle, tile, slate, and even on flat roofs. Anywhere a gutter is hung is a good place for *GutterStuff[®] Pro*.

Frequently Asked Questions

Q. What happens when it freezes?

When the temperature drops to or below the freezing point, it doesn't have any effect because if the downspout cannot block up there is never any water in the gutter to freeze.

Q. When it rains really hard does the gutter run over?

No the filter is non-absorbent. It lets the water run right through.

Q. Do you need to clean it?

No the pore size is just right to let the smallest particles pass through and keeps the larger particles on top to blow off.

Q. How do you install it around the gutter spikes?

Gutter Stuff[®] slides right underneath the gutter spikes.

Q. Do birds and other animals harm the foam?

No, Gutter Stuff[®] has been tested so far for over five years all over the country and that has never happened.

Q. What about the tiny pieces of gravel from the roof shingles?

The gravel passes right through and gets washed down the downspout.

Q. Does the heat from the sunlight harm the foam?

No, only the very top surface gets a little stiff. The rest of the filter is shaded so the Sun's ultra-violet rays cannot harm it.

Q. Can the wind blow it out of the gutter?

No it fits snugly in the gutter and under the spikes.

Q. How long has this product been on the market?

We started marketing the product the first quarter of 2003.
